📄 Career Objective

Automation Test Engineer with **5+ years of experience** in designing and implementing scalable test automation frameworks using **Playwright, JavaScript**, and TypeScript. Experienced in leading automation initiatives, developing reusable frameworks, integrating automated testing with **Azure DevOps CI/CD** pipelines, and improving regression efficiency through parallel execution. Skilled in collaborating with cross-functional teams, driving quality engineering best practices, and delivering reliable **end-to-end automation** solutions for enterprise web and SAP applications.

📄 Professional Summary

- Designed and developed automation frameworks for enterprise web applications.
- Hands-on experience in automation testing using **Playwright, Tosca, and UFT for web-based and SAP applications**.
- Experience in designing, developing, and maintaining automated test scripts for SAP ECC business processes, SAP Fiori, and web applications.
- Hands-on experience designing scalable Playwright automation frameworks using **Page Object Model, Fixtures, Parallel Execution, Browser Contexts**, and Assertions.
- Experienced in **Functional, Regression, Smoke, End-to-End Testing and Parallel Test Execution**.
- Exposure to CI/CD integration and automated regression execution.
- Experience handling test data using **JSON** configurations.
- Strong functional knowledge of **SAP MM, SD, and FICO business processes**.
- Proficient in test planning, **test execution, defect tracking, and automation framework maintenance**.
- Proficient with **Git, GitHub, Azure DevOps, and Agile** development practices.
- Strong analytical, problem-solving, and communication skills with the ability to collaborate effectively with cross functional teams.
- Understanding of modern SDET practices and framework maintainability.
- Contributed to Quality Engineering initiatives by improving automation coverage, framework stability, and regression reliability.

📄 Technical Summary

Automation Tools: Playwright | Tosca | UFT
Languages: JavaScript | TypeScript | Node.js | Python
Framework: Playwright Test | Page Object Model | Fixtures | Data Driven Testing | Parallel Execution
Web Technologies: HTML | CSS | REST API | JSON
CI/CD & Version Control: Azure DevOps | Git | GitHub | GitLab CI (Exposure)
Test Management: JIRA | Agile Scrum | Allure Report | HTML Report
SAP Technologies: SAP ECC | SAP Fiori | SAP MM | SAP SD

📁 Experience

Cognizant	Pune Maharashtra
Associate	03/2023 Present

Client: Leading US Healthcare Company

Project Description:

Worked on automation testing of a **Healthcare Provider Portal** used by internal users to manage member information, provider details, claims, and authorization requests. Developed and maintained Playwright automation scripts using **JavaScript** for critical

business workflows. Built reusable Page Object Model components and automated regression suites integrated with Azure DevOps CI/CD pipelines. The framework was designed to support reusable automation, multiple environments, parallel execution, and continuous regression testing.

Roles & Responsibilities:

- Contributed to the design and enhancement of a scalable Playwright automation framework supporting reusable components and continuous regression testing.
- Standardized automation coding practices to improve framework maintainability and readability.
- Reduced regression execution time from **6 hours to 2 hours** using parallel execution.
- Automated critical business **workflows including Login, Member Search, Claims, Provider Search, Authorization, and User Profile** modules.
- Reviewed automation scripts and resolved framework issues to improve overall execution stability.
- Automated critical business workflows covering 80% of regression scenarios.
- Configured Playwright for parallel execution across multiple browser workers to reduce regression execution time.
- Performed Cross-Browser Testing on Chromium, Firefox, and WebKit.
- Executed Functional, **Smoke, Regression, and End-to-End test suites.**
- Maintained test data using **JSON** files for multiple environments.
- Implemented reusable **Playwright Fixtures, Browser Contexts**, Storage State authentication, and custom utility functions to improve test maintainability and execution efficiency.
- Worked with **Azure DevOps pipelines** to execute automated regression suites.
- Managed environment-specific configurations for QA, UAT, and Pre-Production using configuration files and environment variables.
- Collaborated with onsite teams during sprint planning and release activities.
- Performed root cause analysis for automation failures and collaborated with developers for faster defect resolution.
- Assisted junior automation engineers in understanding the Playwright framework and resolving script issues.
- Debugged failed executions using **Playwright Trace Viewer, screenshots, and execution logs.**
- Generated HTML reports and analyzed execution results for release readiness.

Cognizant

Test Analyst

Client: Cargill

Pune Maharashtra

10/2021 02/2023

Project Description:

Worked on SAP ECC, SAP Fiori, and web application test automation using Tricentis Tosca. Supported automation of business processes across SAP SD, MM, and FICO modules by creating reusable automation components and executing regression and end-to-end test suites.

Roles & Responsibilities:

- Developed reusable **Tosca Modules** using XScan for object identification.
- Designed and maintained automated **TestCases** using Tosca's model-based automation approach.
- Worked closely with SAP Functional Consultants and Business Analysts to understand business requirements and prepare automation test scenarios.
- Automated end-to-end business scenarios for web and SAP applications.
- Executed **Functional, Regression, Smoke, and End-to-End** test suites using **ExecutionLists.**
- Analyzed test execution results and reported defects with detailed evidence.
- Collaborated with functional testers to validate business requirements and ensure adequate test coverage.
- Participated in requirement analysis, test case design, execution, and defect verification. Prepared Test Cases, Test Execution Reports, and Defect Reports.

- Supported automation framework improvements by creating reusable components and optimizing existing test cases.
- Followed Agile methodology and participated in sprint planning, daily stand-ups, and retrospective meetings.
- Improved reusability of Tosca Modules reducing script maintenance effort.
- Collaborated with functional consultants to automate critical SAP business processes.
- Executed automation suites supporting production and UAT releases.

 Education

R.C. Patel Institute of Technology, Shirpur		BTECH • 7.65
Electronics and Telecommunication		Shirpur, Maharashtra • 08/2021

 Certificates

- Cognizant Certified HP UFT - Basic to Intermediate [Aug, 2022]
- Tricentis Tosca Fundamentals – Automation web application testing (AS1) [Feb, 2025]
- Cognizant Certified SAP Sales and Distribution (SD) [Jan, 2022]
- Cognizant Certified SAP MM (Material Management) [Dec, 2021]
- Tricentis TOSCA Fundamentals – Optimizing test automation with centralized test data (AS2) [Feb, 2025]
